## **DETAILED ACTION**

### ***Information Disclosure Statement***

The examiner acknowledges the IDS received after Allowance and continues to uphold his allowance for the following reasons:

1. Regarding prior art JP2002-077227 (Sony Corp), only an Abstract in English is provided. Therefore, said abstract's general teachings do not disclose the highly specific limitations as put forth in independent claims 6 and 7. For example, the allowed claims require:

“...retrieving current pre-emptive criteria from said at least one mail server, comparing said current pre-emptive criteria to previously stored pre-emptive criteria, and in the event said current pre-emptive criteria do not equal said previously stored pre-emptive criteria, then updating said emails between said at least one mail server and mobile communications device or mobile mailbox, and otherwise pre-empting said updating of said emails between said at least one mail server and mobile communication device or mobile mailbox, wherein said pre-emptive criteria comprise at least one of number of messages in said mailbox and size of said mailbox and wherein the polling method is adapted for updating e-mails between multiple external mail servers and the mobile mailbox of the mobile device: the retrieving step comprises retrieving current pre-emptive criteria from each of said multiple external mail servers; and the comparison step comprises comparing said current pre-emptive criteria of previously stored pre-emptive criteria for respective ones of said multiple external servers; in the event said current pre-emptive criteria do not equal said previously stored pre-emptive criteria for a respective one of said multiple external mail servers then updating said e-mails between said respective one of said multiple external mail servers and said mobile mailbox, or otherwise pre-empting said updating of said e-mail, between said respective one of said multiple external mail servers and said mobile mailbox; and wherein said pre-emptive criteria comprise at least one of number of messages in and size of the mailbox of a respective one of said multiple external mail servers..”

Clearly, JP2002-077227 does not teach or disclose the above limitations.

2. Regarding Toshiyuki, the same is true as stated above, eg. the pages cited do not provide the same specific teachings as put forth in the patented claims.
